

TeamViewer – PC Access From Your Mobile Device

Do you want to connect to your computer from your mobile device (iPhone, iPad, Android)? We'll show you how to do it in only three steps.

1 On your computer

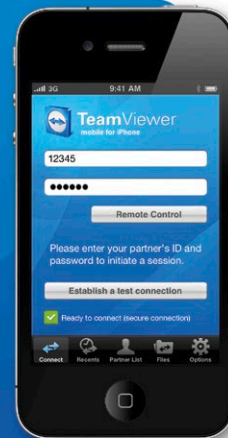

Download TeamViewer full version and start the software. Record the unique ID and the password.

Tip: Read the document "TeamViewer - Setup Unattended Access" to learn how to configure TeamViewer for permanent access.

2 On your mobile device

Install and start the compatible TeamViewer App. Find further information and all apps at: www.teamviewer.com/mobile

3 Connection

From your mobile device, enter the ID and password of the remote computer (from step 1) and control your computer as if you were sitting right in front of it.
