# TeamViewer – **Web Presentation**

Would you like to give a presentation with several participants?
We will show you how to accomplish that in just three steps.

1 You start...

your TeamViewer and select the presentation mode. Click on the link ‚Invitation e-mail' in the lower part of the application window.

2 You send...

an invitation email to all the participants. It contains a link to the website **http://go.teamviewer.com**, the ID of the presenter and the session password.

3 Your customers connect...

to the website **http://go.teamviewer.com** and log on using the ID and password from the invitation e-mail. In no time the participants can see your desktop in their browser window.
